

Name: Eleanor Aimee O. Reantaso

Course & Year: BSIS 2B

Subject: IS ELEC 2 - Web Systems

Professor: Guillermo Red

Week 1 — HTML Fundamentals

In this week, I learned the basic structure of an HTML document and how to use essential elements like headings, paragraphs, lists, links, and images to create a simple webpage. One challenge I faced was remembering the correct opening and closing tags, which sometimes caused my content to display incorrectly. I solved this by creating a quick reference list and checking my code line by line whenever something looked off. I improved my file organization by giving each file a clear, descriptive name instead of using generic titles, which made my work much easier to find later. This foundation helped me understand how every website starts — with a simple text structure.
